## **Energy Aggregation Program Update**

## Important Update on the Township's Community Energy Aggregation Program

Dear Resident,

Since September 2024, the Chester Township's Community Energy Aggregation Program has provided residents with reduced electricity rates through the Hunterdon Area Energy Cooperative, "HAEC" offering a standard rate of \$0.1119/kWh and an optional 100% green energy rate of \$0.1176/kWh.

Due to changes in federal energy regulations impacting capacity pricing, the HAEC is no longer able to provide these lower rates. As a result, beginning **June 1, 2025**, all participating accounts will transition back to **JCP&L's Basic Generation Service**. JCP&L's anticipated electricity supply rates as of June 1, 2025, are:

- **\$0.142668/kWh** for the first 600 kWh used
- **\$0.151893/kWh** for usage above 600 kWh

While the Township explored options to continue the program, these regulatory changes have made it unfeasible to maintain the previously offered rates. Residents remain free to explore alternative electricity supply options. As always, while the aggregation program remains in effect you can opt out at any time without any fees or penalties.

If you have any questions regarding this notice please call the HAEC program's energy agents at **866-688-5197 x 3** or visit the HAEC program webpage at <https://njaggregation.us/haec>.
